Students in 2/3O and 3C enjoyed working in the Kitchen Garden this semester and embraced the Stephanie Alexander motto of Growing, Harvesting, Preparing and Sharing. They have learnt many new skills and now have a collection of great recipes to cook at home. Produce freshly grown in our school garden is used to create a healthy range of delicious food which has made the students more adventurous in their eating. They have gained knowledge of the importance of freshly grown food as well as the nutritional and cost saving benefits. Last week the students made a rustic leek and broccoli tart.

Next semester 4A and 3/4D get the opportunity to participate in the program. A big thank you to our volunteers during semester one. If you would like to assist with the Kitchen Garden Program next semester please contact the school on 67223072.

Jellybean Tables
Our Kindergarten teachers and students are most excited to be using the new jellybean tables in their classrooms. This great design means that teachers are easily able to support students in reading and writing in small groups. These desks will also be used for small group instruction in numeracy.
